

# “Industrial IoT for a secure & reliable Digital Manufacturing world”

Charalampos Gkevrekis | Business Development  
Manager

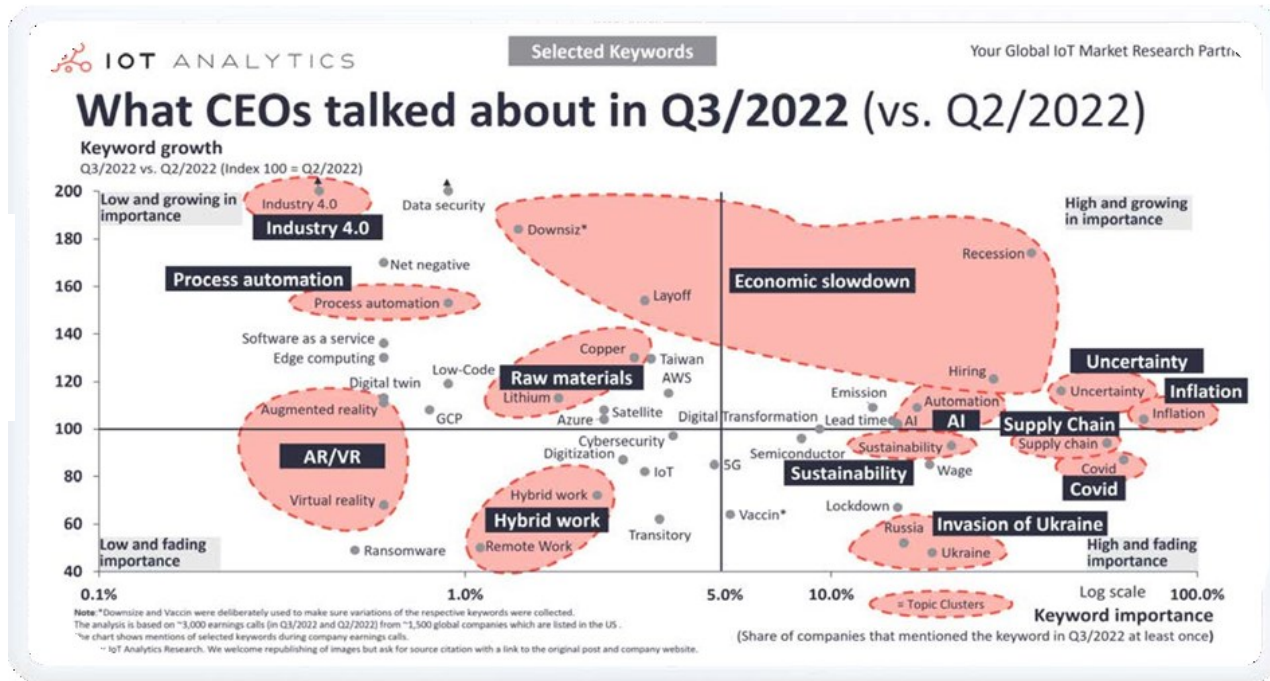

## Agenda

- Manufacturing Trends
- Market Trends for Industrial Organisations
- Manufacturing Challenges
- Industrial IoT Strategy
- The IT&OT convergence
- OT network visibility and Cyber Security
- OT Case study

# Manufacturing Trends

Input Costs  
**+45%**  
Source<sup>2</sup>

Labor costs  
**+4.2%**  
labor cost growth in Europe<sup>5</sup>

2. DESTATIS ('Erzeugerpreise' - includes energy, investment costs, input costs, consumables);
3. What's Going on with Shipping Rates, McKinsey & Co, Aug 2021;
4. DIHK Survey on German companies and their strategies to cope with supply chain issues
5. EUROSTAT; June 2022 data on Q1 labor cost growth
6. DESTATIS Press Release

# Market trends for today's industrial organizations

## Industrial digital transformation

Create the ability to quickly leverage emerging technologies into sustainable top-line growth

## Industrial IoT

Capture real-time performance data that can be used to optimize production and operations

## Business performance targets

Think differently to achieve results that will set your organization apart

## Security

Implement a robust IT-based cybersecurity strategy that supports OT teams and creates a strong security culture across the organization

## Services and software

Increasing numbers of manufacturers across industries are providing software and service innovations that complement and enhance their products and processes

# Challenges to realizing transformational change

Establish a robust and secure production infrastructure to help industrial organizations reach new performance levels

Leverage new technologies to improve performance and flexibility (AI, ML, analytics, cloud, IIoT)

Bring OT and IT together, protecting OT operations and IT networks while maintaining regulatory compliance

Define, deploy, and implement cybersecurity best practices in the OT environment without raising TCO

# The risk of not moving forward

**Operational inefficiencies and increased downtime from lack of data and slower, manual processes**

**Ability to adequately protect their production systems, including networks, data, and equipment**

**Inability to leverage analytics solutions to optimize processes and assets**

**Increasing costs from maintaining multiple, disparate networks**

# Imagine your organization with fully converged OT and IT

How much could you benefit by bringing together the best of OT and IT into one secure, streamlined ecosystem?

## Best of OT

- Ease of use
- Industrial features
- Industry certifications

## Best of IT

- Fully manageable IP network
- Cyber security solutions
- Cloud connectivity

Security

# Benefits available with OT and IT convergence

- Up to 80% engineering cost and time optimization
- Up to 80% energy cost savings
- Up to 75% maintenance cost optimization
- Up to 50% carbon footprint optimization
- Superior uptime and resilience
- End-to-end communications, from sensor to cloud
- Ease and confidence of deployment based on OT and IT expertise

# Digitization is enabling Resilience and Sustainability

## RESILIENCY

Industrial Smart Working

Virtual commissioning

Supply Chain Redesign

## SUSTAINABILITY

Energy monitoring & efficiency

Information-based processes

Digital Twin decision model

Environment monitoring  
& data-based decision process

# Digitization Demanding a new class of infrastructure

## More Network Bandwidth

Video, AGVs, thermal imagery  
3D sensors drive increased need

## Low Latency, Resilient Communications & Rich Data

Real-time control of unmanned vehicles.  
Secure, context rich (time, location) data delivered to IoT apps

## Cyber Security

Explosive growth in connected devices increases expansion of the threat surface

## Simplified Scale

Deploy & manage more devices across more locations with the same resources

## Edge Compute

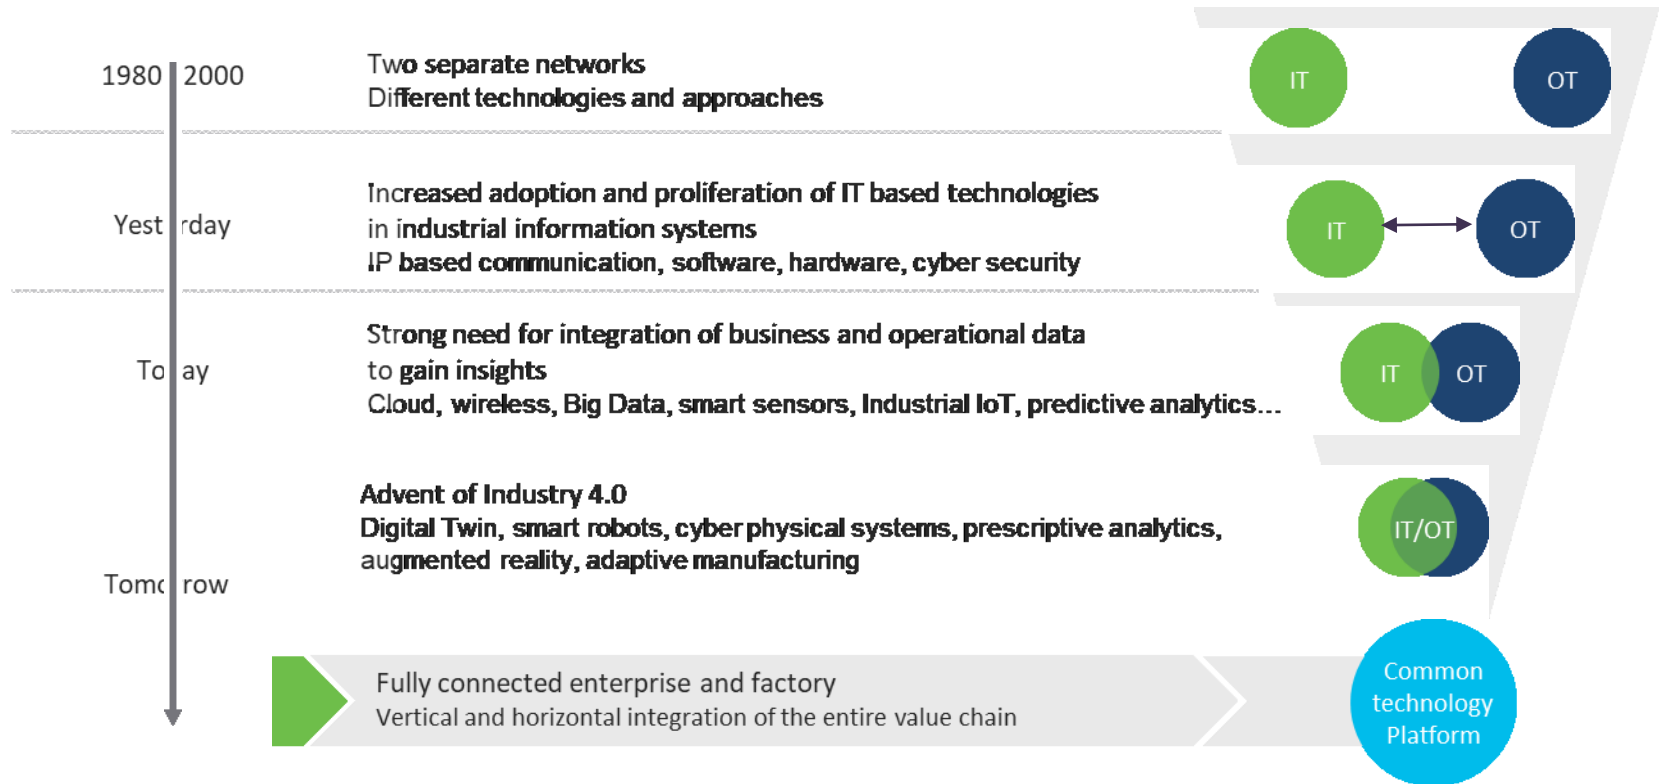

Process and act on data faster when it is closer to its source. Maintain compliance. Save costs.

Driving the need for further IT/OT collaboration

# The IT & OT convergence

# A continuous technology alignment

For almost two decades, IT and OT technologies have started to converge towards a common technology platform.

# To be successful, IT and OT must collaborate every step of the way.

# IT and OT share common problems

Goal

## Scalability

Deploy 1000's of assets quickly and reliably

## Security

Avoid business impact from security issues

## Missed Insights

Maintain reliable services and improve efficiency

Challenges

Resources for operational assets

Greatly expanded threat surface impacts OT & IT

Too many tools make it difficult to be proactive

Networking skills and resolving issues

Business resiliency to cyber attack

Lack of visibility creates inefficiency & downtime

# Industrial networking combines enterprise-grade with industrial-strength

## Best of IT

### Manageable by Cisco DNA Center

Same management tools as Enterprise

### Proven Cisco Security Solutions

Supports MACsec, TrustSec SGT, SGACL, Netflow, Cisco ISE, SecureX

### IOS-XE Operating System

Next Gen Secure Enterprise OS, SW Defined support

## Best of OT

### Ease of Use

Device Manager, SD Card Swap

### Industrial Features

PROFINET, Ethernet/IP, Modbus, PRP, MRP, HSR, Precise Time

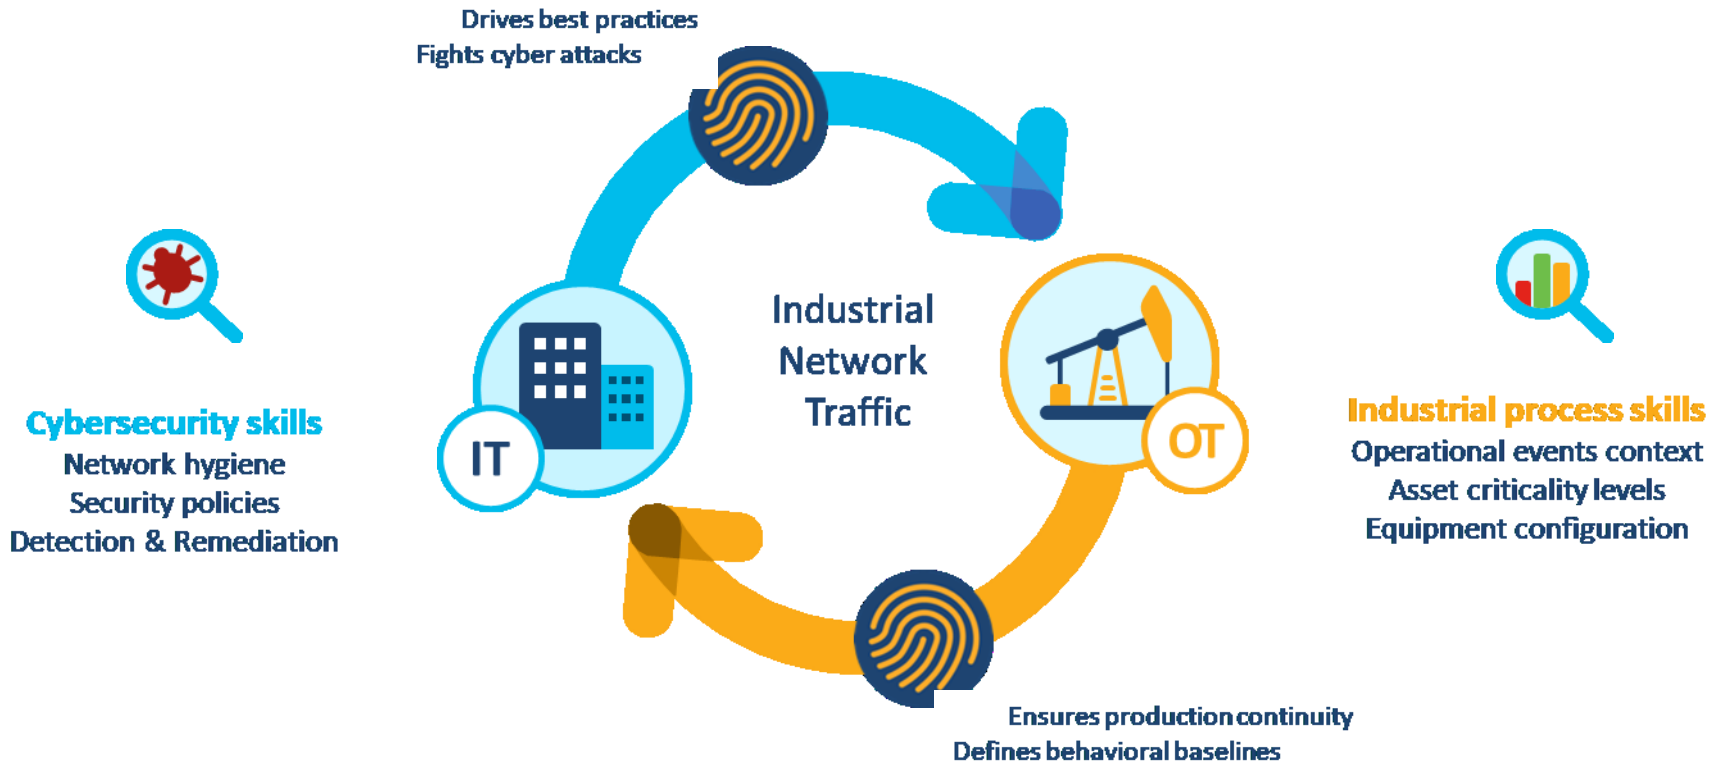

### Industry Certifications

ODVA, Profinet, Shock and Vibration, IP30-67, Extended Temps, IEC 62443 Cybersecurity.

Security

# IT-OT collaboration is vital for securing ICS

# The OT network visibility & Cyber Security

# Digitization is accelerating seamless movement of data across Enterprise

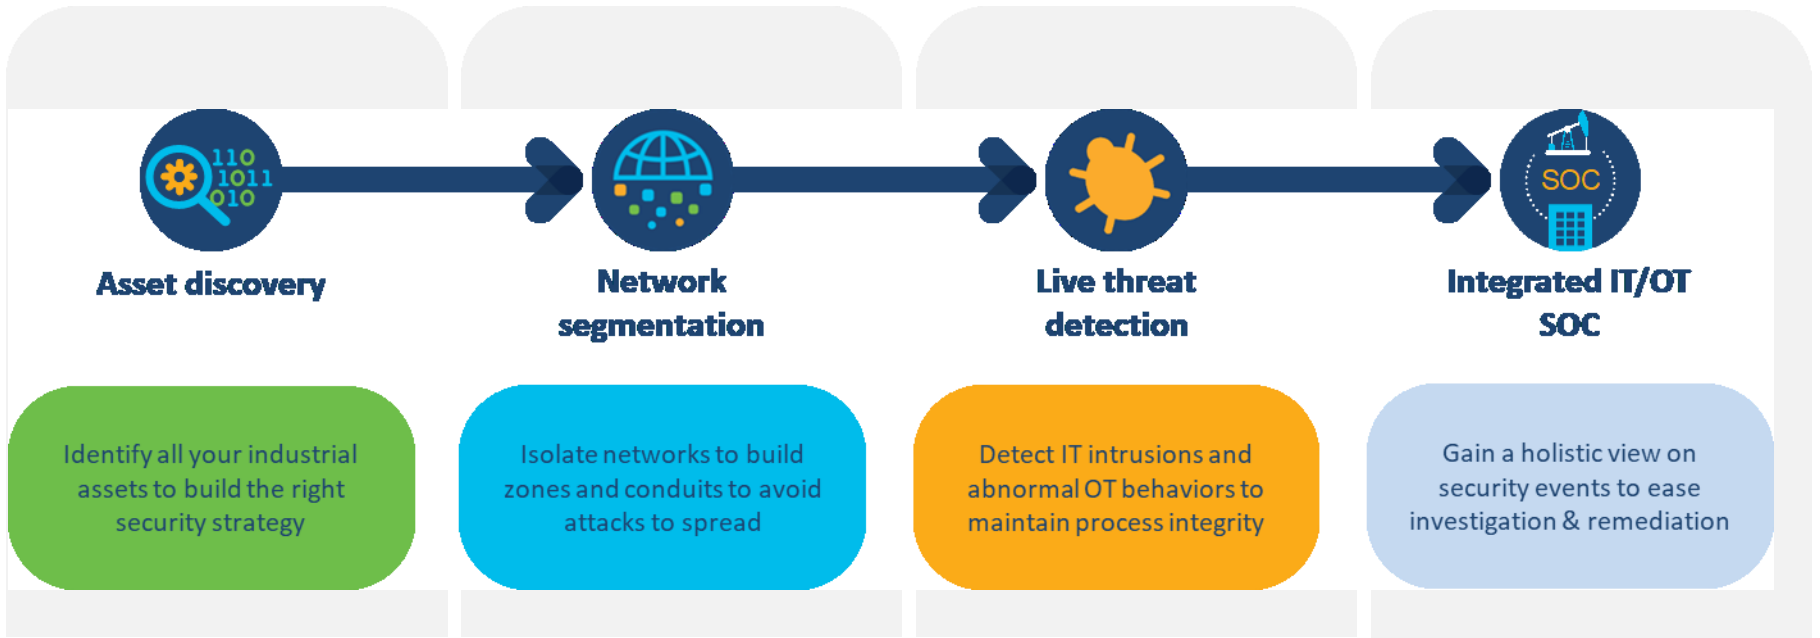

Digitization **Increases** The Attack Surface

## Cybersecurity is the top driver

# The 4-step journey to secure your industrial network

**Gain visibility on your OT to build and enforce the right security policies**

# Cisco Cyber Vision

## Asset Inventory & Security platform for the industrial IoT

Protect your industrial control systems against cyber risks

**Visibility**  
Know your assets

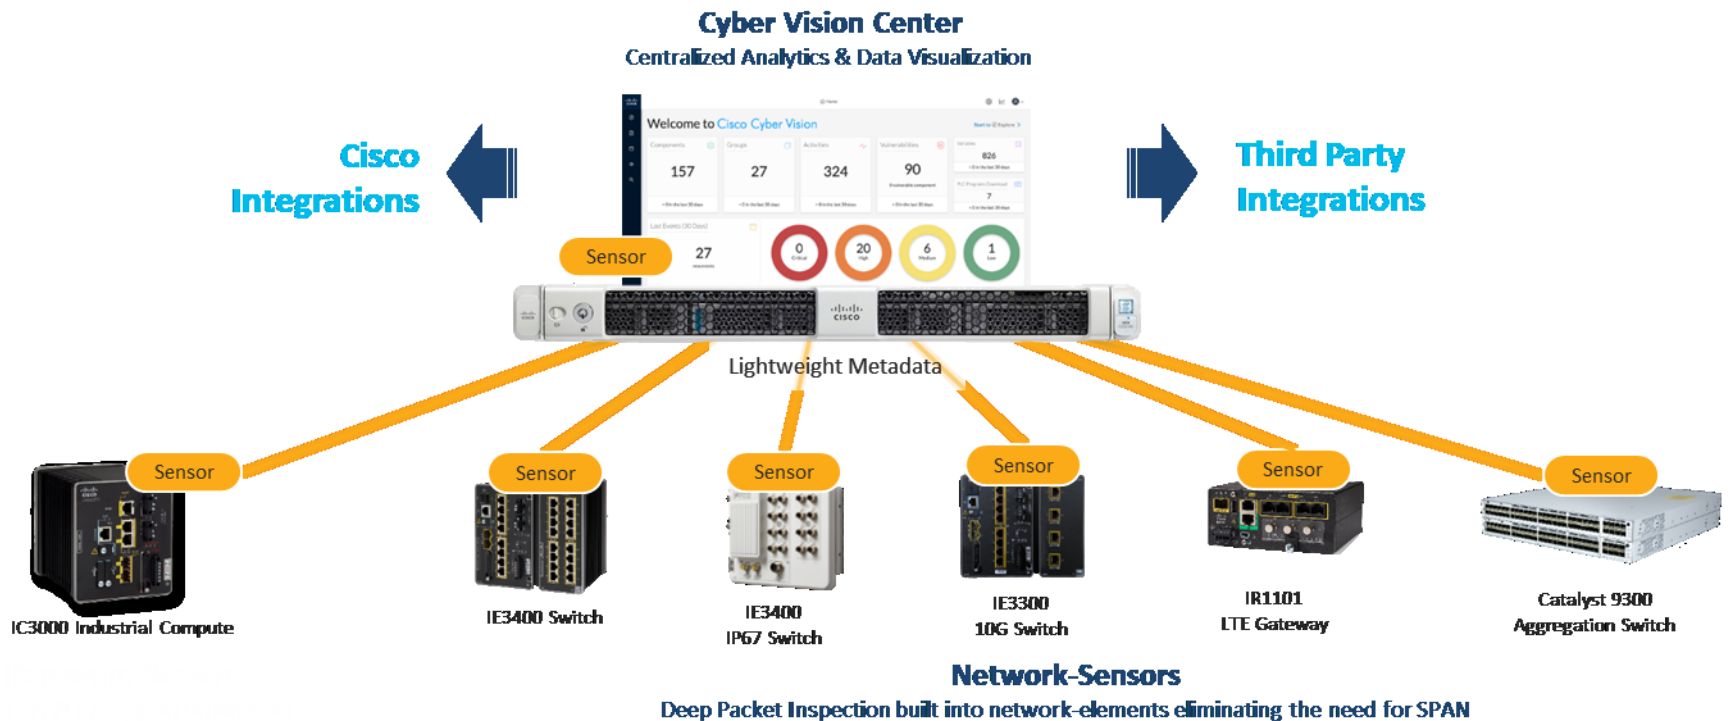

**Insights**  
Track your processes

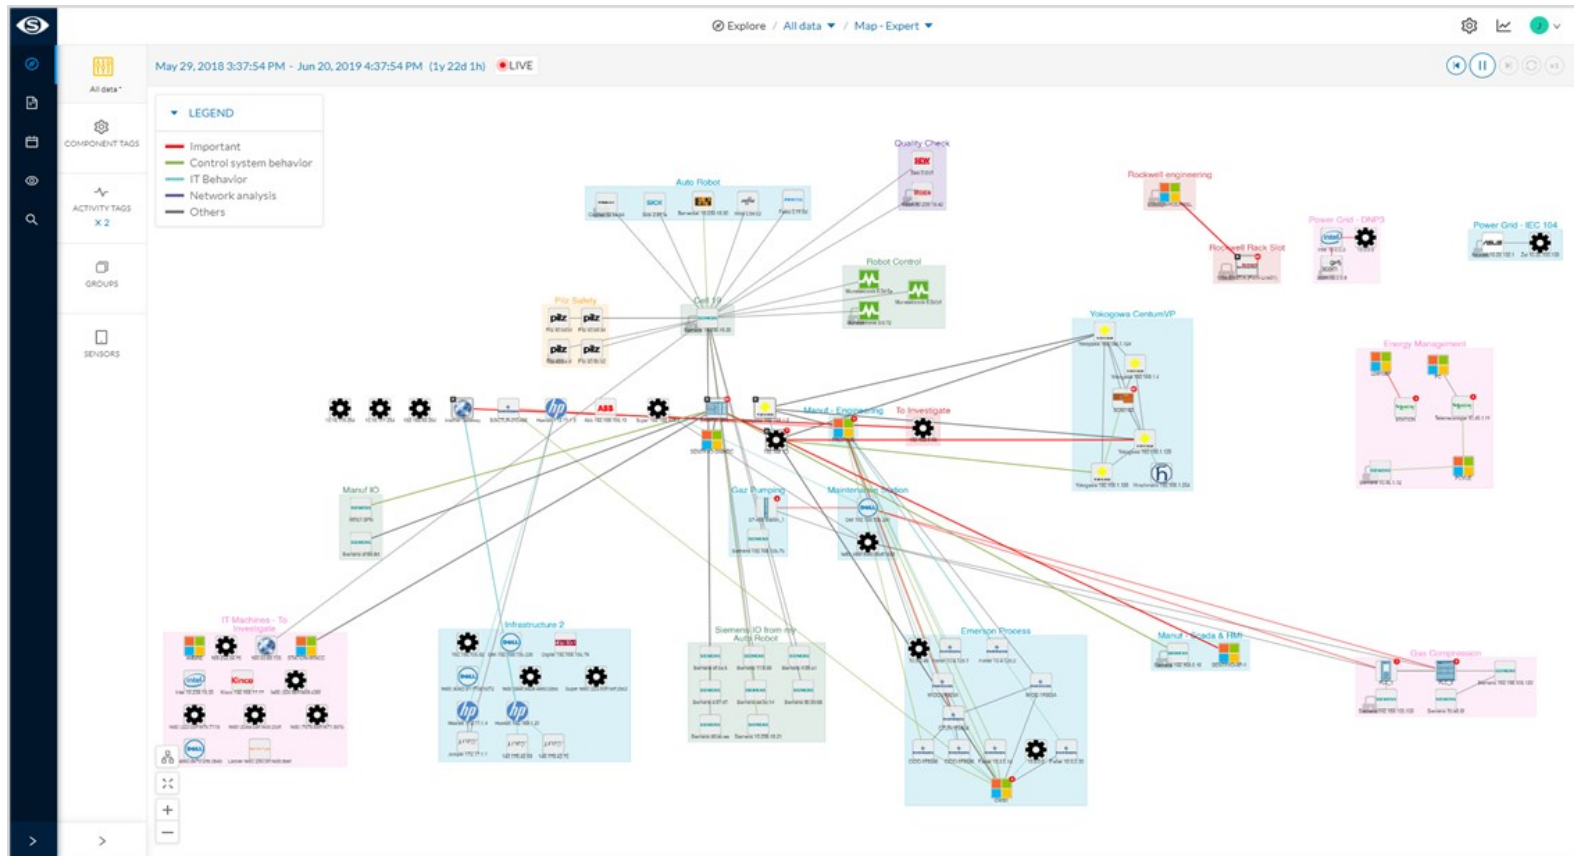

**Detection**  
Trigger alerts

# Security that scales with your infrastructure

Visibility and threat detection built into your industrial network

# Visibility is the only possible beginning of the journey to secure ICS environments

# 100% visibility and insights on industrial operations

**Detailed asset inventory**

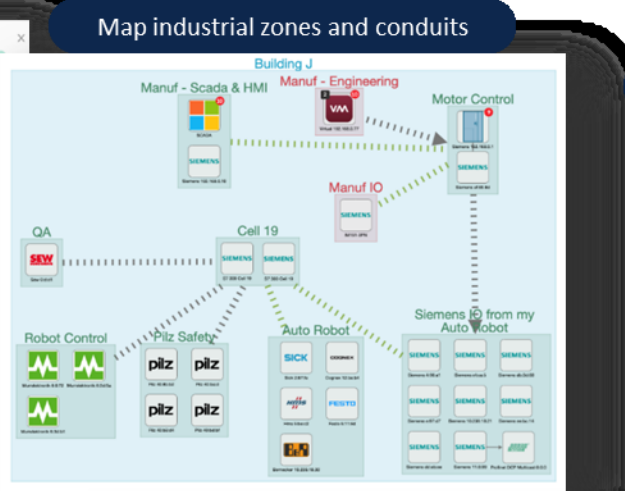

**Component:** SIMATIC 300(1)  
 Manheim - Furnace #...  
 IP: 192.168.0.1  
 MAC: 00:0e:8c:84:5b:a6

**Activity:** May 15, 2020 3:59:05 PM  
 Last activity: Nov 20, 2020 11:58:24 PM

**Tags:** Controller, Activity tags: Program Download, Start CPU, Stop CPU, Block Download, Read Var, Write Var, Ping, Broadcast, Low Volume, ARP, S7 (hide)

**Properties:**

- vendor-name: Siemens AG
- model-name: CPU 315-2 PU/DP
- fw-version: V 2.5.0
- hw-version: 3
- model-ref: 6ES7 315-2EH13-0AB0
- serial-number: S C-V1RS83472007
- name: SIMATIC 300(1)
- ip: 192.168.0.1
- public-ip-no
- mac: 00:0e:8c:84:5b:a6
- i7-module-ref: 6ES7 315-2EH13-0AB0
- i7-module-ver: 3
- name-i7-plc: SIMATIC 300(1)
- i7-serial-number: S C-V1RS83472007
- vendor: Siemens AG
- i7-slot: 2
- i7-bootloader-ref: Boot Leader
- name-vendor-ip: Siemens 192.168.0.1
- i7-rack: 0
- i7-plc-name: SIMATIC 300(1)
- i7-fw-ver: V 2.5.0
- i7-hw-ver: 3
- i7-bootloader-ver: A 10.12.9
- i7-hw-ref: 6ES7 315-2EH13-0AB0
- i7-module-name: CPU 315-2 PU/DP

**Detect changes in the control system**

**Activity**

- PLC\_3 Gas Compression **very high**  
 IP: 192.168.105.130  
 MAC: 28:43:36:82:28:96
- Dell Maintenance Station **high**  
 IP: 192.168.105.241  
 MAC: 94:17:ebd1:c9:97

# “OT Case Study”

# Asset Visibility with Cisco CyberVision

## Requirements

- Visibility for OT assets and Traffic
- OT network segmentation for minimizing risk of malware expansion to all areas of OT network
- Integrations with existing Cisco security suite of products already using in IT network.
- Scripting Automation capabilities for managing OT assets (Grouping, naming, tagging etc.).

## Solution

- Cybervision Software sensor on their existing Cat9300 switches
- IDS snort rules running on Sensor level for OT malware inspection

## Outcomes

- Unified Visibility of all OT Asset attributes and communications flows.
- Visibility was the first fundamental step for starting OT segmentation journey
- Better visibility on 3<sup>rd</sup> Party OT vendor remote connections to the production network .
- Automation via scripting on certain reporting & alerting required by the OT Personnel on specific OT tasks.

***A major Paper Manufacturer in Portugal chose Cisco Cybervision solution to increase visibility into their industrial assets and traffic, getting also better control into their 3rd party OT vendor remote connections to the production lines.***
